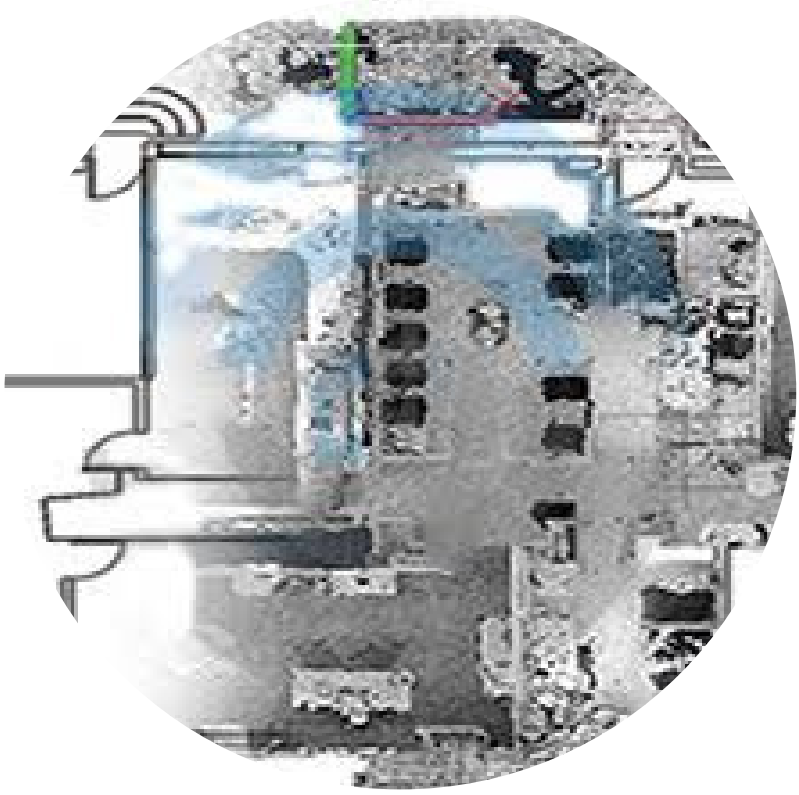
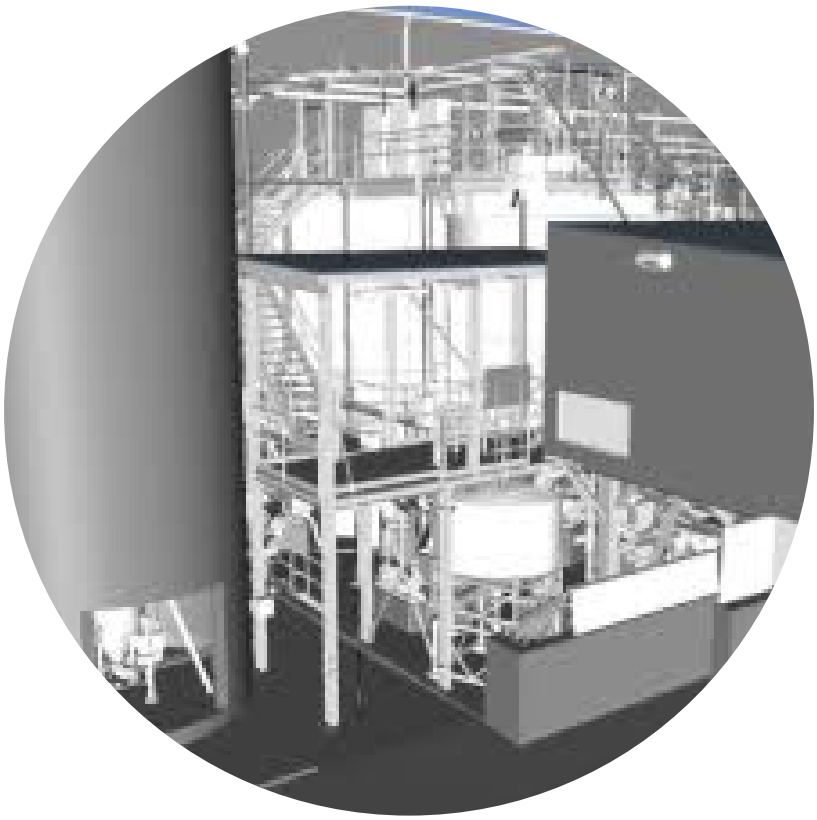
TECSAVA IT PRIVATE LIMITED

Point Cloud to CAD Services | Accurate Scan-to-CAD Conversion Solutions

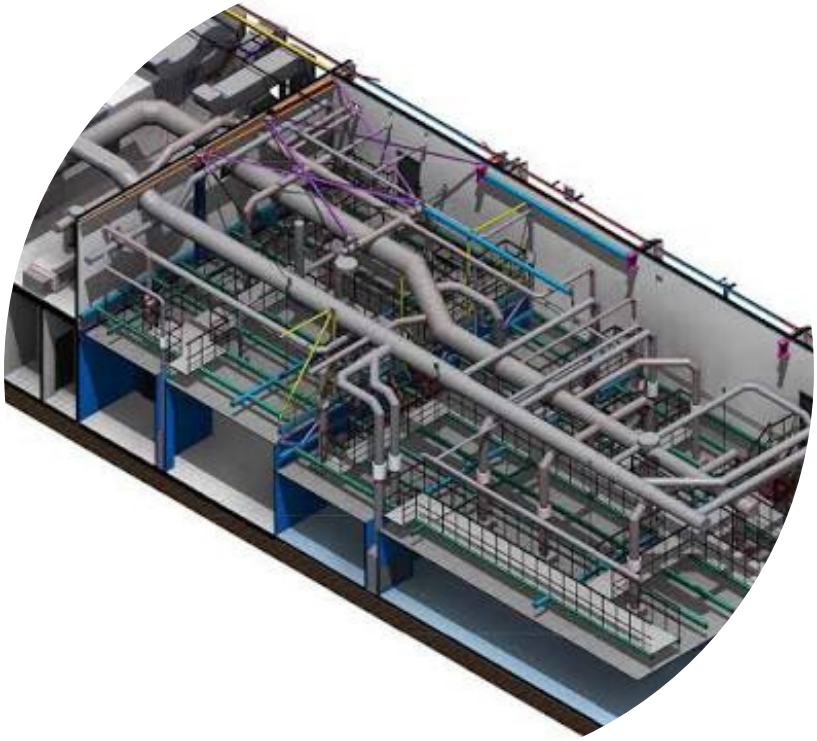




Looking for reliable Point Cloud to CAD Services to transform laser scan data into precise engineering drawings? Tecsava IT Private Limited specializes in converting point cloud datasets into accurate 2D CAD drawings and detailed 3D CAD models for architecture, engineering, construction, industrial, and infrastructure projects.

Our experienced CAD professionals work with data captured from LiDAR, terrestrial laser scanners, and 3D scanning technologies to deliver clean, standards-compliant CAD files that improve project planning and execution.

We create highly accurate floor plans, elevations, sections, as-built drawings, and technical documentation while preserving every critical design detail. By combining advanced CAD software with strict quality control, we ensure dependable results, faster turnaround times, and cost-effective solutions tailored to your project requirements.



Whether you need CAD vectorization for renovations, facility management, BIM workflows, or engineering documentation, our customized services help streamline complex projects with precision and efficiency. Partner with Tecsava for professional Point Cloud to CAD Services that support smarter decision-making and enhanced project accuracy.
